Jean Tiemann
re: 807 Grand, Madison, IL

Dear Ms. Tiemann:

The U.S. Environmental Protection Agency (EPA) has completed the cleanup of the lead contamination in the yard located at 807 Grand, Madison, Illinois, in connection with the NL Industries/Taracorp site in Granite City, Illinois (the NL site). By way of this letter, U.S. EPA is certifying that this yard has been cleaned up to less than 500 parts per million lead, the level which U.S. EPA considers protective of children's health at the NL site.

If you have any questions concerning this letter or need further information, please contact me at (312) 886-4742 or toll-free at 1-800-621-8431.

Sincerely,

Brad W Bradley
